VTI
NYSE ARCA

PRICE (AS OF CLOSE) **\$53.59** 09/30/2009 | **TODAY'S CHANGE** **\$0.00 (0.00%)**

HISTORICAL PRICE PERFORMANCE

FUND STRATEGY

The investment seeks to track the performance of a benchmark index that measures the investment return of the overall stock market. The fund employs a passive management strategy designed to track the performance of the MSCI US Broad Market index, which consists of all the U.S. common stocks traded regularly on the New York Stock Exchange and the Nasdaq over-the-counter market. It typically holds 1,200-1,300 of the stocks in its target index.

PERFORMANCE RETURNS

MORNINGSTAR RATING

rating as of 08/31/2009

Overall rating	Category: Large Blend
★ ★ ★ ★ ★	OUT OF 26 FUNDS
3 year rating	OUT OF 26 FUNDS
5 year rating	OUT OF 14 FUNDS
10 year rating	OUT OF 1 FUNDS
RATING NOT AVAILABLE	

Past performance is no guarantee of future results. The ratings reflect historical risk-adjusted performance, and the overall rating is derived from a weighted average of the fund's 3, 5 and 10 year Morningstar Rating metrics.

Performance data quoted represents past performance and does not indicate future results. Visit Schwab.com for month-end performance information. Current performance may be lower or higher. Investment value will fluctuate, and shares, when redeemed may be worth less than original cost.

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The top 10% of the funds in an investment category receive 5 stars, 22.5% receive 4 stars, 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

IMPORTANT INFORMATION REGARDING THIS REPORT

Investors in ETFs should consider carefully information contained in the prospectus, including investment objectives, risks, charges and expenses. You can request a prospectus by calling 800-435-4000. Please read the prospectus carefully before investing. Investors in Closed-End Funds please note that since these securities are not continuously offered, there may be no prospectus available.

Exchange Traded Funds and Closed-End Funds are subject to market risk. Investment returns will fluctuate and are subject to market volatility, so that an investor's shares, when redeemed or sold, may be worth more or less than their original cost. Investments in foreign investments may incur greater risks than domestic investments. Past performance is no guarantee of future results.

Schwab does not recommend the use of technical analysis as a sole means of investment research.

Sector investing may involve a greater degree of risk than an investment in other funds with broader diversification.

Investors holding leveraged or inverse ETFs for longer than one day should proceed with extreme caution. Leveraged ETFs seek to provide a multiple (e.g., 2x or 3x) of the investment returns of a given index or benchmark on a daily basis. Inverse ETFs, also on a daily basis, seek to provide the opposite of the investment returns of a given index or benchmark (either in whole or by multiples like -2x or -3x). Due to the effects of compounding – i.e., the need to increase or decrease exposure to an index or benchmark each day in order to "re-set" – leveraged and inverse ETFs can experience greater losses than one would expect judging solely from the multiple. Compounding can also cause the differential between ETF performance and underlying index or benchmark performance to expand over time. Consequently, leveraged and inverse ETFs may experience losses even in situations where the underlying index or benchmark has performed as hoped. These products use of leverage and complex derivative instruments may also expose shareholders to substantially increased risk.
